Deluxe Modular Plug Kit

Figure 1. The tool terminates a variety of types and sizes of modular plugs.

Complete tool and die set for RJ-type modular plugs.

Key Features

- ▶ Comes complete with all the dies you need.
- ▶ Each tool includes a wire cutter and a jacket-insulation stripper to prepare flat cable.
- ▶ Lightweight (weighs four pounds) and compact (metal box measures 1.6"H x 11.5"W x 8"D).

Technically Speaking

The Deluxe Modular Plug Kit comes complete with a Termination Tool, a die set, and four-, six-, and eight-position plugs.

The tool terminates a variety of types and sizes of modular plugs, as shown in Figure 1 above. The tool can also cut and strip flat cables. Other cables pictured in Figure 1 will also terminate to the plugs, but must be first cut and stripped. Each tool includes a wire cutter and jacket-insulation stripper to prepare the appropriately sized flat cable.

Cutting and stripping the cable is a breeze with this tool. Using the information in Figure 1 above, select the appropriate jacketed cable for the plug you are terminating. Cut and strip the cable as follows:

- Flat oval cable—use the CUT and STRIP slots of the termination tool.
- Jacketed round cable—trim and strip using appropriate commercially available tools.

- Shielded cable—prepare according to requirements.
- High performance cable—prepare according to requirements.

Before terminating a plug, double-check to be sure cable and plug are compatible, and that cable polarity is correctly maintained for your specific application.
