

# Summit® X250e Series

*Summit X250e series 24- or 48-port Fast Ethernet stackable switches provide compelling converged edge solutions with the revolutionary modular operating system, ExtremeXOS™.*

## Voice-Class Availability

- Modular ExtremeXOS operating system
- Ethernet Automatic Protection Switching (EAPS) resiliency protocol
- SummitStack™—highly available, high-speed stacking support

## Designed for Converged Network Applications

- Quality of Service (QoS) with advanced traffic management capabilities for converged applications
- Convergence ready connectivity with Voice-over-IP (VoIP) automatic provisioning with Universal Port capability
- Comprehensive network management

## Comprehensive Security Using Defense-in-Depth

- User policy and host integrity enforcement
- Extensive MAC and IP security functionality to help prevent man-in-the-middle attacks
- Universal Port dynamic security profile to provide fine granular security policy in the network

*The Summit X250e series switch is an advanced Fast Ethernet converged edge switch with ExtremeXOS modular operating system at an affordable price.*

Summit X250e series switches are based on the revolutionary ExtremeXOS™ core-class operating system from Extreme Networks®. ExtremeXOS is a highly resilient, modular operating system that helps provide continuous uptime, manageability and operational efficiency at an affordable price.

Summit X250e provides high availability and performance with its advanced traffic management capabilities. Summit X250e supports the large scale rollout of a converged network with devices such as IP telephones, wireless APs and other devices that require power from a LAN connection. Summit X250e-24x supports carrier Ethernet edge deployment with its flexible fiber connectivity options. Summit X250e-24x can support 100BASE-FX, 100BASE-LX10 and 100BASE-BX on its SFP ports depending upon deployment requirements.

Summit X250e supports hardware-based routing for both IPv4 and IPv6 to help provide investment protection by allowing the rollout of IPv6 in your network now or in the future.

The highly flexible Summit X250e switch provides high-density Fast Ethernet ports plus dedicated 40 Gbps high-speed stacking ports in a compact 1RU format, supporting a full range of Layer 2 to Layer 4 functionality on every port for high productivity. Optional redundant power supplies are provided with each switch to help secure against power anomalies.

## Target Applications

- Edge PoE and non-PoE switch providing intelligent 10/100BASE-T connectivity to the desktop in a network running ExtremeXOS from the core to the edge
- Carrier Ethernet edge switching with 100BASE-X provides advanced fiber connectivity to the customer

## Voice-Class Availability

Powered by ExtremeXOS, the Summit X250e switch supports process recovery and application upgrades without the need for a system reboot. Summit X250e offers the high network availability required for converged applications.

### Modular Operating System for High Availability Operation

#### True Preemptive Multitasking and Protected Memory

Summit X250e switches allow each of the many applications—such as Open Shortest Path First (OSPF) and Spanning Tree Protocol (STP)—to run as separate Operating System (OS) processes that are protected from each other. This drives increased system integrity and helps protect against Denial of Service (DoS) attacks.

#### Process Monitoring and Restart

ExtremeXOS improves network availability using process monitoring and restart. Each independent OS process is monitored in real time. If a process becomes unresponsive or stops running, it can be automatically restarted.

#### Loadable Software Modules

The modular design of ExtremeXOS allows the upgrading of individual software modules, should this be necessary, leading to higher availability in the network (see Figure 1).

### High Availability Network Protocols

#### Ethernet Automatic Protection Switching (EAPS)

EAPS allows the IP network to provide the level of resiliency and uptime that users expect from their traditional voice network. EAPS differs from Spanning Tree or Rapid Spanning Tree protocols and offers sub-second (less than 50

milliseconds) recovery that helps deliver consistent failover regardless of the number of VLANs, network nodes or network topology. Since EAPS allows the network to recover almost transparently, VoIP calls do not drop and digital video feeds do not freeze or pixelize in most situations.

#### Spanning Tree/Rapid Spanning Tree Protocols

Summit X250e switches support Spanning Tree (802.1D), Per VLAN Spanning Tree (PVST+), Rapid Spanning Tree (802.1w) and Multiple Instances of Spanning Tree (802.1s) protocols for Layer 2 resiliency.

#### Software-Enhanced Availability

Software-enhanced availability allows users to remain connected to the network even if part of the network infrastructure is down. Summit X250e switches continuously check for problems in the uplink connections using advanced Layer 3 protocols such as OSPF, VRRP and ESRP (ESRP supported in Layer 2 or Layer 3), and dynamically routes traffic around the problem.

#### Equal Cost Multipath Routing

Equal Cost Multipath (ECMP) routing allows uplinks to be load balanced for performance and cost savings while also supporting redundant failover. If an uplink fails, traffic is automatically routed to the remaining uplinks and connectivity is maintained.

#### Link Aggregation (802.3ad)

Link aggregation allows trunking of up to eight links on a single logical connection, for up to 2 Gigabits per Second (Gbps) of redundant bandwidth per logical connection.

### Voice-Grade Stacking with SummitStack

Summit X250e offers dual stacking interfaces to provide high-speed 40 Gbps stacking bandwidth. SummitStack architecture is designed to support converged services by its highly available, rapid failover capability with n-1 master redundancy, distributed Layer 2 and Layer 3 switching, link aggregation across the stack and distributed uplinks. SummitStack supports up to eight units in a stack (mixture of the units can be Summit X250e, Summit X450e, Summit X450a and Summit X450 switches) and provides sub seconds failover for path failure and hitless master/backup failover along with hitless protocol support such as OSPF graceful restart, PoE configuration and Network Login user authentication.

Summit X250e provides chassis-like management and availability with its SummitStack stacking technology (see Figure 2).

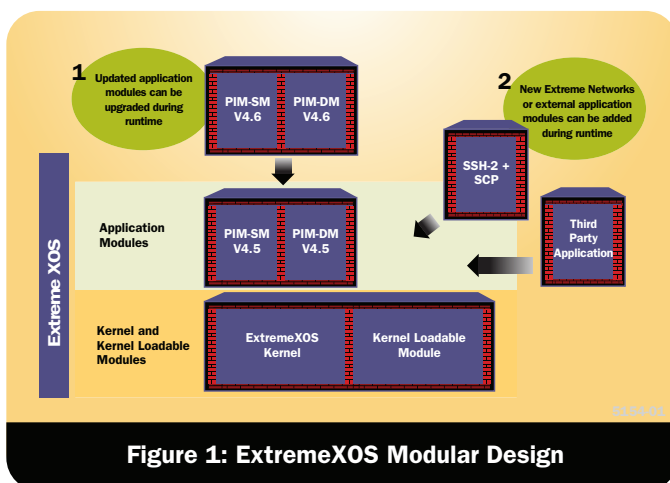

Figure 1: ExtremeXOS Modular Design

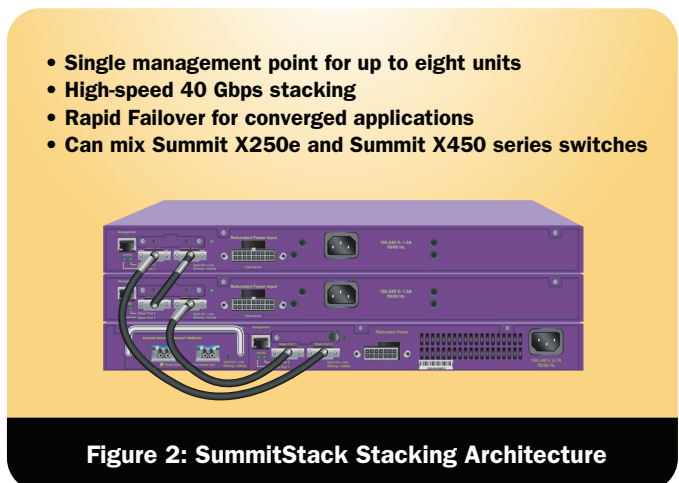

Figure 2: SummitStack Stacking Architecture

## Designed for Converged Network Applications

Summit X250e switches provide non-blocking architecture with copper and fiber Fast Ethernet ports for demanding edge applications. Combining exceptional QoS and advanced traffic management with resiliency, comprehensive security features and non-blocking performance, Summit X250e switches are designed to be the cornerstone of an advanced intelligent converged network.

### Exceptional Policy-based QoS with Advanced Traffic Management for Converged Applications

Summit X250e provides eight hardware queues per port to support granular traffic classification with bandwidth allocation. 1,024 centralized classifiers per 24-port block can use information from Layers 1 through 4 to prioritize and meter incoming packets at line-rate. When metering traffic, the switches can drop out-of-spec traffic or flag it for later action. To expedite upstream traffic handling, a packet's classification can be carried forward with Layer 2 (802.1p) and Layer 3 (Diffserv) markings. Summit X250e provides advanced traffic management features that offer high-quality triple play of voice, video and data services.

### Efficient Management to Handle Convergence-Driven Network Changes

#### Universal Port—VoIP Auto Provisioning

Summit X250e sets the stage for convergence applications by allowing enterprises to add new access devices in a non-disruptive Plug-and-Play fashion. Voice and wireless services can be easily implemented without major network upgrades. Summit X250e supports automated provisioning of VoIP using Link Layer Discovery Protocol (LLDP) and event-based command scripting capability. It allows dynamic configuration of voice VLANs and QoS. This auto configuration capability allows you to configure VoIP phone settings such as voice VLAN settings, call server IP address configuration, etc. (see Figure 3). This level of simplicity in managing network changes can reduce operating expenses.

#### Power over Ethernet

Deployments of IP Telephony depend on reliable consistent power from the Ethernet jack. Summit X250e-24p and Summit X250e-48p are the basis for a reliable LAN telephony infrastructure with fully redundant 15.4 watts per port, and QoS and resiliency to match the failover requirements for latency-sensitive services like VoIP phones. With Summit X250e, deployment of powered LAN devices is quick and easy with its support of the

IEEE 802.3af standard and full Class 3 power availability on all ports, backed up 100% by the EPS-500 redundant power supply (Summit X250e-24p). Summit X250e-48p can provide up to 370W of PoE power and can be increased up to 740W of PoE power to provide full 15.4W class 3 devices on all 48-port by adding External Power System (EPS-C and EPS-600LS).

#### Voice Grade Connections

Granular QoS, low latency and low jitter enable voice quality connections. Summit X250e supports a range of QoS technologies that can prioritize and predictably handle high priority traffic-policing or rate limiting on ingress, 802.1Q tagging and Diffserv marking, and shaping on egress with eight queues per port. The Extreme Networks tradition of building products with low latency and jitter continues with the Summit X250e series—allowing network managers to build networks with low end-to-end latency and jitter.

#### Comprehensive Network Management

As network becomes a foundation of the enterprise application, the network management becomes important piece of solution. Summit X250e supports comprehensive network management through Command Line Interface (CLI), SNMP v1, v2c, v3 and embedded XML based Web User

Interface, ExtremeXOS™ ScreenPlay™. With a variety of management options and consistency across other Extreme Networks modular and stackable switches, Summit X250e series switches can provide ease-of-management for demanding converged applications.

Extreme Networks has developed tools that help save you time and resources in managing your network. EPICenter® provides fault configuration, accounting, performance and security functions, allowing more effective management of Extreme Networks multi-layer switching equipment in a converged network.

### Advanced Routing Capabilities for the Edge

Summit X250e supports advanced protocols for an efficient and productive network. Summit X250e switches provide static and RIP routing for simple IPv4 and IPv6 Layer 3 deployment. An optional ExtremeXOS Advanced Edge license extends the feature set to include other important edge functions such as:

- Edge OSPF for much greater extensibility than RIP can provide
- Edge PIM sparse modes for routing of multicast streams
- Policy-based routing
- sFlow® hardware sampling

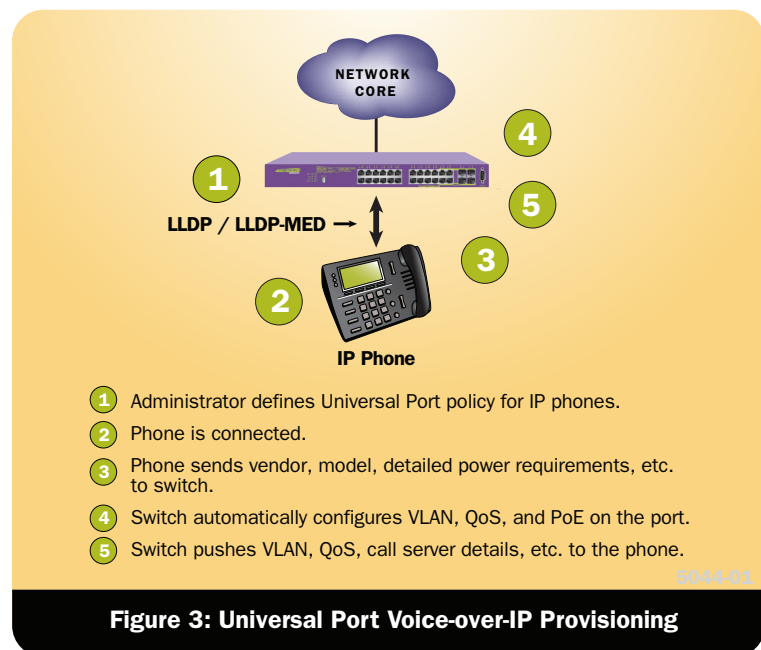

Figure 3: Universal Port Voice-over-IP Provisioning

## Comprehensive Security Functionality Using Defense-in-Depth

Implementing a secure network means providing protection at the network perimeter as well as the core. Working together with the Sentiariant™ family of products from Extreme Networks, Summit X250e series uses a defense-in-depth strategy to help protect your network from known or potential threats. Security offerings from Extreme Networks encompass three key areas: user and host integrity, threat detection and response, and hardened network infrastructure.

### User Authentication and Host Integrity Checking

#### Network Login and Dynamic Security Profile

Network Login capability enforces user admission and usage policies. Summit X250e series switches support a comprehensive range of Network Login options by providing an 802.1x agent-based approach, a web-based (agent-less) login capability for guests, and a MAC-based authentication model for devices. With these modes of Network Login, only authorized users and devices are permitted to connect to the network and be assigned to the appropriate VLAN. The Universal Port scripting framework lets you implement Dynamic Security Profiles which in sync with Network Login allows you to implement fine grained and robust security policies. Upon authentication, the switch can load dynamic ACL/QoS for a user or group of users, to deny/allow the access to the application servers or segments within the network.

#### Multiple Supplicant Support

Shared ports represent a potential vulnerability in a network. Multiple supplicant capability on a switch allows it to uniquely authenticate and apply the appropriate policies and VLANs for each user or device on a shared port.

Multiple supplicant support helps secure IP Telephony and wireless access. Converged network designs often involve the use of shared ports (see Figure 4).

### MAC Security

MAC security allows the lock down of a port to a given MAC address and to limit the number of MAC addresses on a port. This can be used to dedicate ports to specific hosts or devices such as VoIP phones or printers and avoid abuse of the port—an interesting capability specifically in environments such as hotels. In addition, an aging timer can be configured for the MAC lockdown, protecting the network from the effects of attacks using (often rapidly) changing MAC addresses.

### IP Security

ExtremeXOS IP Security framework helps protect the network infrastructure, network services such as DHCP and DNS and host computers from spoofing and man-in-the-middle attacks. It also helps protect the network from statically configured and/or spoofed IP addresses and builds an external trusted database of MAC/IP/port bindings providing the traffic's source from a specific address for immediate defense.

### Host Integrity Checking

Host integrity checking helps keep infected or non-compliant machines off the network. Summit X250e series switches support a host integrity or endpoint integrity solution that is based on the model from the Trusted Computing Group. Summit X250e interfaces with Sentiariant™ AG, endpoint security software from Extreme Networks, to verify that each endpoint meets the security policies that have been set and quarantines those that are not in compliance.

### Network Intrusion Detection and Response

#### Hardware-Based sFlow Sampling

sFlow is a sampling technology that provides the ability to continuously monitor application level traffic flows on all interfaces simultaneously. The sFlow agent is a software process that runs on Summit X250e and packages data into sFlow datagrams that are sent over the network to an sFlow collector. The collector gives an up-to-the-minute view of traffic across the entire network, providing the ability to troubleshoot network problems, control congestion and detect network security threats.

#### Port Mirroring

To allow threat detection and prevention, Summit X250e supports many-to-one and one-to-many port mirroring. This allows the mirroring of traffic to an external network appliance such as an intrusion detection device for trend analysis or for utilization by a network administrator for diagnostic purposes. Port Mirroring can also be enabled across switches in a stack.

#### Line-Rate ACLs

ACLs are one of the most powerful components used in controlling network resource utilization as well as protecting the network. Summit X250e supports 1,024 centralized ACLs per 24-port based on Layer 2, 3 or 4-header information such as the MAC, IPv4 and IPv6 address or TCP/UDP port.

#### Denial of Service Protection

Summit X250e can effectively handle DoS attacks. If the switch detects an unusually large number of packets in the CPU input queue, it will assemble ACLs that automatically stop these packets from reaching the CPU. After a period of time, these ACLs are removed, and reinstalled if the attack continues. ASIC-based LPM routing eliminates the need for control plane software to learn new flows, allowing more network resilience against DoS attacks.

#### Secure Management

To prevent management data from being intercepted or altered by unauthorized access, Summit X250e supports SSH2, SCP and SNMPv3 protocols. The MD5 hash algorithm used in authentication prevents attackers from tampering with valid data during routing sessions.

Summit X250e offers multiple supplicant which helps providing the per MAC based authentication with dynamic VLAN allocation

Figure 4: Multiple Supplicant Support

## Target Applications

### Edge Connectivity for Advanced Enterprise Applications

Edge PoE and non-PoE switch provides intelligent 10/100BASE-T connectivity to the desktop in a network running ExtremeXOS from the core to the edge.

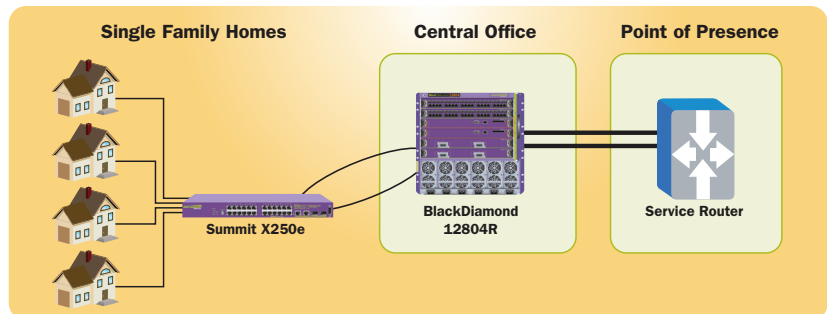

Summit X250e is deployed as intelligent Fast Ethernet edge switch, extending the benefits of the ExtremeXOS operating system to the network edge in the enterprise network. This uniformity allows consistent quality and performance throughout your converged network while minimizing operational inefficiencies. With low latency and line-rate performance, Summit X250e edge switch connects wireless devices, LAN telephony, PDAs and other equipment without compromising security, scalability, availability, mobility or management.

### Edge Connectivity for Advanced Carrier Ethernet Applications

Carrier Ethernet edge switching with 100BASE-X provides advanced fiber connectivity to the customer.

Summit X250e is deployed as an intelligent Fast Ethernet edge switch, extending the benefits of the ExtremeXOS operating system to the network edge in the carrier Ethernet network. This uniformity allows consistent quality and performance throughout your converged network while minimizing operational inefficiencies. With low latency and line-rate performance, the Summit X250e edge switch provides copper 10/100BASE-T connectivity as well as 100BASE-X connectivity including 100BASE-FX, 100BASE-LX10 and 100BASE-BX. A flexible connectivity option is offered without compromising security, scalability, availability, mobility or management.

# Technical Specifications

## ExtremeXOS V12.0 Supported Protocols

### Switching

- RFC 3619 Ethernet Automatic Protection Switching (EAPS) and EAPsv2
- IEEE 802.1D – 1998 Spanning Tree Protocol (STP)
- IEEE 802.1D – 2004 Spanning Tree Protocol (STP and RSTP)
- IEEE 802.1w – 2001 Rapid Reconfiguration for STP, RSTP
- IEEE 802.1Q-2003 (formerly IEEE 802.1s) Multiple Instances of STP, MSTP
- EMISTP, Extreme Multiple Instances of Spanning Tree Protocol
- PVST+, Per VLAN STP (802.1Q interoperable)
- Extreme Standby Router Protocol (ESRP)
- IEEE 802.1Q – 1998 Virtual Bridged Local Area Networks
- IEEE 802.3ad Static load sharing configuration and LACP based dynamic configuration
- IEEE 802.1AB – LLDP Link Layer Discovery Protocol
- LLDP Media Endpoint Discovery (LLDP-MED), ANSI/TIA-1057, draft 08
- Extreme Discovery Protocol (EDP)
- Extreme Loop Recovery Protocol (ELRP)
- Extreme Link State Monitoring (ELSM)
- Software Redundant Ports

### VLANs, vMANs

- IEEE 802.1Q VLAN Tagging
- IEEE 802.1v: VLAN classification by Protocol and Port
- Port-based VLANs
- Protocol-based VLANs
- Multiple STP domains per VLAN
- IEEE 802.1ad Virtual MANs (vMANs)

### Quality of Service and Policies

- IEEE 802.1D – 1998 (802.1p) Packet Priority
- RFC 2474 DiffServ Precedence, including 8 queues/port
- RFC 2598 DiffServ Expedited Forwarding (EF)
- RFC 2597 DiffServ Assured Forwarding (AF)
- RFC 2475 DiffServ Core and Edge Router Functions

### IPv4

- RFC 1812 Requirements for IP Version 4 Routers
- RFC 1519 CIDR
- RFC 1256 IPv4 ICMP Router Discovery (IRDP)
- RFC 1122 Host Requirements
- RFC 768 UDP
- RFC 791 IP
- RFC 792 ICMP
- RFC 793 TCP
- RFC 826 ARP
- RFC 894 IP over Ethernet
- RFC 1027 Proxy ARP
- RFC 2068 HTTP server – Used for web-based Network Login
- RFC 2338 VRRP
- Static Unicast Routes
- Static Multicast Routes
- RFC 1058 RIP v1
- RFC 2453 RIP v2
- RFC 2328 OSPF v2 (including MD5 authentication)
- RFC 1587 OSPF NSSA Option
- RFC 1765 OSPF Database Overflow
- RFC 2370 OSPF Opaque LSA Option
- RFC 3623 OSPF Graceful Restart
- RFC 1112 IGMP v1

- RFC 2236 IGMP v2
- RFC 3376 IGMP v3
- IGMP v1/v2/v3 Snooping with Configurable Router Registration Forwarding
- IGMP Filters
- Static IGMP Membership
- Multicast VLAN Registration
- RFC 2362 PIM-SM
- RFC 3569, draft-ietf-ssm-arch-06.txt PIM-SSM PIM Source Specific Multicast

### IPv6

- RFC 2460, Internet Protocol, Version 6 (IPv6) Specification
- RFC 2461, Neighbor Discovery for IP Version 6, (IPv6)
- RFC 2462, IPv6 Stateless Address Auto configuration – Router Requirements
- RFC 2463, Internet Control Message Protocol (ICMPv6) for the IPv6 Specification
- RFC 2464, Transmission of IPv6 Packets over Ethernet Networks
- RFC 2465, IPv6 MIB, General Group and Textual Conventions
- RFC 2466, MIB for ICMPv6
- RFC 1981, Path MTU Discovery for IPv6, August 1996 – Router requirements
- RFC 3513, Internet Protocol Version 6 (IPv6) Addressing Architecture
- RFC 3587, Global Unicast Address Format
- RFC 2710, IPv6 Multicast Listener Discovery v1 (MLDv1) Protocol
- RFC 3810, IPv6 Multicast Listener Discovery v2 (MLDv2) Protocol
- RFC 2080, RIPng
- RFC 2893, Configured Tunnels
- RFC 3056, 6to4
- Static Unicast routes for IPv6
- Telnet server over IPv6 transport
- SSH-2 server over IPv6 transport
- Ping over IPv6 transport
- Traceroute over IPv6 transport

### Management and Traffic Analysis

- RFC 2030 SNMP, Simple Network Time Protocol v4
- RFC 854 Telnet client and server
- RFC 783 TFTP Protocol (revision 2)
- RFC 951, 1542 BootP
- RFC 2131 BOOTP/DHCP relay agent and DHCP server
- RFC 1591 DNS (client operation)
- RFC 1155 Structure of Mgmt Information (SMIv1)
- RFC 1157 SNMPv1
- RFC 1212, RFC 1213, RFC 1215 MIB-II, Ethernet-Like MIB & TRAPS
- RFC 1573 Evolution of Interface
- RFC 1650 Ethernet-Like MIB (update of RFC 1213 for SNMPv2)
- RFC 1901 – 1908 SNMP v2c, SMIv2 and Revised MIB-II
- RFC 2570 – 2575 SNMPv3, user based security, encryption and authentication
- RFC 2576 Coexistence between SNMP Version 1, Version 2 and Version 3
- RFC 1757 RMON 4 groups: Stats, History, Alarms and Events
- RFC 2021 RMON2 (probe configuration)
- RFC 2668 802.3 MAU MIB
- RFC 1643 Ethernet MIB
- RFC 1493 Bridge MIB

- RFC 1354 IPv4 Forwarding Table MIB
- RFC 2737 Entity MIB v2
- RFC 2233 Interface MIB
- RFC 1354 IP Forwarding Table MIB
- RFC 1724 RIPv2 MIB
- RFC 1850 OSPFv2 MIB
- draft-ietf-pim-mib-v2-01.txt
- RFC 2787 VRRP MIB
- Draft-ietf-bridge-rstpmib-03.txt – Definitions of Managed Objects for Bridges with Rapid Spanning Tree Protocol
- Secure Shell (SSH-2) client and server
- Secure Copy (SCP-2) client and server
- Secure FTP (SFTP) server
- sFlow version 5
- Configuration logging
- Multiple Images, Multiple Configs
- BSD System Logging Protocol (SYSLOG), with Multiple Syslog Servers
- 999 Local Messages (criticals stored across reboots)
- Extreme Networks vendor MIBs (includes FDB, PoE, CPU, Memory MIBs)
- Web-based device management interface
- Stacking

### Security

- Routing protocol MD5 authentication (see above)
- Secure Shell (SSH-2), Secure Copy (SCP-2) and SFTP client/server with encryption/authentication (requires export controlled encryption module)
- SNMPv3 user based security, with encryption/authentication (see above)
- RFC 1492 TACACS+
- RFC 2138 RADIUS Authentication
- RFC 2139 RADIUS Accounting
- RFC 3579 RADIUS EAP support for 802.1x
- RADIUS Per-command Authentication
- Access Profiles on All Routing Protocols
- Access Policies for Telnet/SSH-2/SCP-2
- Network Login - 802.1x, web and MAC-based mechanisms
- IEEE 802.1x – 2001 Port-Based Network Access Control for Network Login
- Multiple supplicants with multiple VLANs for Network Login (all modes)
- Fallback to local authentication database (MAC and Web-based methods)
- Guest VLAN for 802.1x
- RFC 1866 HTML – Used for web-based Network Login
- SSL/TLS transport – used for web-based Network Login, (requires export controlled encryption module)
- MAC Security – Lockdown and Limit
- IP Security – RFC 3046 DHCP Option 82 with port and VLAN ID
- IP Security – DHCP enforcement via Disable ARP Learning
- IP Security – Gratuitous ARP Protection
- IP Security – Trusted DHCP Server
- IP Security – DHCP Secured ARP/ARP Validation
- Layer 2/3/4 Access Control Lists (ACLs)

### Denial of Service Protection:

- RFC 2267 Network Ingress Filtering
- RPF (Unicast Reverse Path Forwarding) Control via ACLs
- Wire-speed ACLs

## Technical Specifications

- Rate Limiting/Shaping by ACLs
- IP Broadcast Forwarding Control
- ICMP and IP-Option Response Control
- SYN attack protection
- CPU DoS Protection with traffic rate-limiting to management CPU
- Robust against common Network Attacks:
  - CERT (<http://www.cert.org>)
  - CA-2003-04: “SQL Slammer”
  - CA-2002-36: “SSHredder”
  - CA-2002-03: SNMP vulnerabilities
  - CA-98-13: tcp-denial-of-service
  - CA-98.01: smurf
  - CA-97.28:Teardrop\_Land – Teardrop and “LAND” attack
  - CA-96.26: ping
  - CA-96.21: tcp\_syn\_flooding
  - CA-96.01: UDP\_service\_denial
  - CA-95.01: IP\_Spoofing\_Attacks\_and\_Hijacked\_Terminal\_Connections
  - IP Options Attack
- Host Attacks
  - Teardrop, boink, opentear, jolt2, newtear, nestea, syndrop, smurf, fraggle, papasmurf, synk4, raped, winfreeze, ping -f, ping of death, pepsi5, Latierra, Winnuke, Simping, Sping, Ascend, Stream, Land, Octopus

### Summit X250e-24t

#### General Specifications

##### Performance

- 48.8 Gbps switch fabric bandwidth
- 36.3 Mpps frame forwarding rate
- 9216 Byte maximum packet size (Jumbo Frame)
- 128 load sharing trunks, up to 8 members per trunk
- 8 QoS queues/port
- 4094 VLANs (Port, Protocol, IEEE 802.1Q)
- 1,024 centralized ACL rules per switch

##### Forwarding Tables

- Layer 2/MAC Addresses: 8K
- IPv4 LPM Entries: 512
- IPv6 LPM Entries: 256

##### Rate Limiting

- Ingress bandwidth policing/rate limiting per flow
- Egress bandwidth rate limiting per egress queue
- Rate Limiting Granularity: 64Kbps
- Available Rate Limiters: 1,024 per switch

##### Indicators

- Per port status LED
- System Status LEDs: management, fan and power

##### Ports

- 24 ports 10/100BASE-T with auto-speed and auto-polarity
- 2 ports Gigabit Ethernet (100/1000BASE-X SFP, shared PHY with 2 10/100/1000BASE-T ports)
- 2 SummitStack stacking interfaces
- 1 port Serial (control port)
- 1 10/100BASE-T out-of-band management port

### Physical Specifications

#### Dimensions and Weight

Height: 1.73 Inches/4.4 Cm  
Width: 17.35 Inches/44.1 Cm  
Depth: 12.13 Inches/30.8 Cm  
Weight: 10.47 Lbs/4.76 Kg

#### EPS Dimensions and Weight

##### EPS-T

Height: 1.75 Inches/4.4 Cm  
Width: 17.4 Inches/44 Cm  
Depth: 7.6 Inches/19.3 Cm

##### EPS-160

Height: 1.7 Inches/4.3 Cm  
Width: 7.4 Inches/18.8 Cm  
Depth: 7.9 Inches/20 Cm

### Operating Specifications

#### Temperature

- Operating Temperature Range: 0° C to 40° C (32° F to 104° F)
- Operating Humidity: 10% to 93% relative humidity, non-condensing
- Operational Shock (Half Sine): 30 m/s<sup>2</sup> (3g), 11ms, 60 Shocks
- Operational Random Vibration: 5 – 500 Hz @ 1.5g rms

#### Storage & Transportation Conditions (Packaged)

- Transportation Temperature: -40° C to 70° C (- 40° F to 158° F)
- Storage and Transportation Humidity: 60% to 95% RH, non-condensing
- Packaged Shock (Half Sine): 180 m/s<sup>2</sup> (18g), 6ms, 600 shocks
- Packaged Sine Vibration: 5 – 62 Hz @ Velocity 5mm/s, 62 – 500 Hz @ 0.2 G
- Packaged Random Vibration: 5 – 20 Hz @ 1.0 ASD w/-3dB/oct. from 20 – 200 Hz
- 14 drops min on sides & corners @ 42"(<15kg box)

#### Power & Acoustic Sound

- Voltage Input Range: 90 – 264V Nominal Input Ratings: 100-240V~, 50/60Hz, 1.0A
- Input Current: 0.5A @ 115V~ (lowline) 0.25A @ 230V~ (high-line)
- Maximum In-Rush Current: 30A @115V/60 Hz, Max Load
- Efficiency: 83% with 60% – 100% load
- Line Frequency Range: 47 – 63 Hz
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation: 36W (123 BTU/h)
- Power Consumption: 36W (123 BTU/h)
- Acoustic Noise (Low FAN Speed): 37 dBA per ISO 7779
- Acoustic Noise (High FAN Speed): 45 dBA per ISO 7779

#### External Power Supply – EPS-160

- Voltage Input Range: 90 – 264V
- Nominal Input Ratings: 100 – 240V~, 50-60Hz, 10A
- Line Frequency Range: 47 – 63 Hz
- Maximum Input Current: 2A at 115 VAC, 1A at 230 VAC
- Maximum Inrush Current: 30A at 115 VAC, 60A at 230 VAC
- Power Supply Input Socket: IEC 320 C144
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation: 38.5W (131.4 BTU/h)
- Power Consumption: 178W (607.4 BTU/h)

### Summit X250e-48t

#### General Specifications

##### Performance

- 97.6 Gbps switch fabric bandwidth
- 39.9 Mpps frame forwarding rate
- 9,216 Byte maximum packet size (Jumbo Frame)

- 128 load sharing trunks, up to 8 members per trunk
- 8 QoS queues/port
- 4,094 VLANs (Port, Protocol, IEEE 802.1Q)
- 1,024 centralized ACL rules per 24-port

##### Forwarding Tables

- Layer 2/MAC Addresses: 8K
- IPv4 LPM Entries: 512
- IPv6 LPM Entries: 256

##### Rate Limiting

- Ingress bandwidth policing/rate limiting per flow
- Egress bandwidth rate limiting per egress queue
- Rate Limiting Granularity: 64Kbps
- Available Rate Limiters: 1,024 per switch

##### Indicators

- Per port status LED including power status
- System Status LEDs: management, fan and power

##### Ports

- 48 ports 10/100BASE-T with auto-speed and auto-polarity
- 2 ports Gigabit Ethernet (100/1000BASE-X SFP, shared PHY with 2 10/100/1000BASE-T ports)
- 2 SummitStack stacking interfaces
- 1 port serial (console port)
- 1 10/100BASE-T out-of-band management port

### Physical Specifications

#### Dimensions and Weight

Height: 1.73 Inches/4.4 Cm  
Width: 17.35 Inches/44.1 Cm  
Depth: 15.28 Inches/38.8 Cm  
Weight: 12.06 lbs/5.48 Kg

#### EPS Dimensions and Weight

##### EPS-T

Height: 1.75 Inches/4.4 Cm  
Width: 17.4 Inches/44 Cm  
Depth: 7.6 Inches/19.3 Cm

##### EPS-160

Height: 1.7 Inches/4.3 Cm  
Width: 7.4 Inches/18.8 Cm  
Depth: 7.9 Inches/20 Cm

### Operating Specifications

#### Temperature

- Operating Temperature Range: 0° C to 40° C (32° F to 104° F)
- Operating Humidity: 10% to 93% relative humidity, non-condensing
- Operational Shock (Half Sine): 30 m/s<sup>2</sup> (3g), 11ms, 60 Shocks
- Operational Random Vibration: 5 – 500 Hz @ 1.5g rms

#### Storage & Transportation Conditions (Packaged)

- Transportation Temperature: -40° C to 70° C (- 40° F to 158° F)
- Storage and Transportation Humidity: 60% to 95% RH, non-condensing
- Packaged Shock (Half Sine): 180 m/s<sup>2</sup> (18g), 6ms, 600 shocks
- Packaged Sine Vibration: 5 – 62 Hz @ Velocity 5mm/s, 62 – 500 Hz @ 0.2 G
- Packaged Random Vibration: 5 – 20 Hz @ 1.0 ASD w/-3dB/oct. from 20-200 Hz
- 14 drops min on sides & corners @ 42" (<15kg box)

#### Power & Acoustic Sound

- Voltage Input Range: 90 – 264V
- Nominal Input Ratings: 100-240V~, 50/60Hz, 1.0A

## Technical Specifications

- Input Current: 0.6A @ 115V~ (lowline) 0.3A @ 230V~ (high-line)
- Maximum In-Rush Current: 30A @115V/60 Hz, Max Load
- Efficiency: 83% with 60% – 100% load
- Line Frequency Range: 47 – 63 Hz
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation: 51W (174 BTU/h)
- Power Consumption: 51W (174 BTU/h)
- Acoustic Noise (Low FAN Speed): 37 dBA per ISO 7779
- Acoustic Noise (High FAN Speed): 47 dBA per ISO 7779

### External Power Supply - EPS-160

- Voltage Input Range: 90 – 264V
- Nominal Input Ratings: 100 – 240V~, 50 – 60Hz, 4A
- Line Frequency Range: 47 – 63 Hz
- Maximum Input Current: 2A at 115 VAC, 1A at 230 VAC
- Maximum Inrush Current: 30A at 115 VAC, 60A at 230 VAC
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation: 38.5W (131.4 BTU/h)
- Power Consumption: 178W (607.4 BTU/h)

## Summit X250e-24p

### General Specifications

#### Performance

- 48.8 Gbps switch fabric bandwidth
- 36.3 Mpps frame forwarding rate
- 9,216 Byte maximum packet size (Jumbo Frame)
- 128 load sharing trunks, up to 8 members per trunk
- 8 QoS queues/port
- 4,094 VLANs (Port, Protocol, IEEE 802.1Q)
- 1,024 centralized ACL rules per switch

#### Forwarding Tables

- Layer 2/MAC Addresses: 8K
- IPv4 LPM Entries: 512
- IPv6 LPM Entries: 256

#### Rate Limiting

- Ingress bandwidth policing/rate limiting per flow
- Egress bandwidth rate limiting per egress queue
- Rate Limiting Granularity: 64Kbps
- Available Rate Limiters: 1,024 per switch

#### Indicators

- Per port status LED including power status
- System Status LEDs: management, fan and power

#### Ports

- 24 ports 10/100BASE-T PoE with auto-speed and auto-polarity
- 2 ports Gigabit Ethernet (100/1000BASE-X SFP, shared PHY with 2 10/100/1000BASE-T ports)
- 2 SummitStack stacking interfaces
- 1 port serial (console port)
- 1 10/100BASE-T out-of-band management port

## Physical Specifications

### Dimensions and Weight

Height: 1.73 Inches/4.4 Cm  
Width: 17.35 Inches/44.1 Cm  
Depth: 12.13 Inches/30.8 Cm  
Weight: 12.1 Lbs/5.46 Kg

### EPS Dimensions and Weight

### EPS-500

Height: 1.73 Inches/4.4 Cm  
Width: 17.4 Inches/44 Cm  
Depth: 7.6 Inches/19.3 Cm  
Weight: 10.8 Lbs/4.9 Kg

## Operating Specifications

### Temperature

- Operating Temperature Range: 0° C to 40° C (32° F to 104° F)
- Operating Humidity: 10% to 93% relative humidity, non-condensing
- Operational Shock (Half Sine): 30 m/s<sup>2</sup> (3g), 11ms, 60 Shocks
- Operational Random Vibration: 5 – 500 Hz @ 1.5g rms

### Storage & Transportation Conditions (Packaged)

- Transportation Temperature: -40° C to 70° C (- 40° F to 158° F)
- Storage and Transportation Humidity: 60% to 95% RH, non-condensing
- Packaged Shock (Half Sine): 180 m/s<sup>2</sup> (18g), 6ms, 600 shocks
- Packaged Sine Vibration: 5 – 62 Hz @ Velocity 5mm/s, 62 – 500 Hz @ 0.2 G
- Packaged Random Vibration: 5 – 20 Hz @ 1.0 ASD w/-3dB/oct. from 20 – 200 Hz
- 14 drops min on sides & corners @ 42" (<15kg box)

### Power & Acoustic Sound

- Voltage Input Range: 90 – 264V
- Nominal Input Ratings: 100 – 240V~, 50/60Hz, 5.5A
- Input Current (with PoE full load): 4.4A @ 115V~ (lowline) 2.2A @ 230V~ (high-line)
- Input Current (without PoE): 0.75A @ 115V~ (lowline) 0.5A @ 230V~ (high-line)
- Maximum In-Rush Current: 30A @115V/60 Hz, Max Load
- Efficiency: 81% with 60% – 100% load
- Line Frequency Range: 47 – 63 Hz
- Nominal Frequency Range: 50 – 60 Hz
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation (with PoE full load): 100W (341BTU/h)
- Power Consumption (with PoE full load): 470W (1604 BTU/h)
- Heat Dissipation (without PoE): 55W (188 BTU/h)
- Power Consumption (without PoE): 55W (188 BTU/h)
- Acoustic Noise (Low FAN Speed): 39 dBA per ISO 7779
- Acoustic Noise (High FAN Speed): 44 dBA per ISO 7779

### External Power Supply – EPS-500

- Voltage Input Range: 90 – 264V
- Nominal Input Ratings: 100 – 240V~, 50 – 60Hz, 10A
- Line Frequency Range: 47 – 63 Hz
- Maximum Input Current: 5.75A at 115 VAC, 2.80A at 230 VAC
- Maximum Inrush Current: 30A at 115 VAC, 60A at 230 VAC
- Output: -50 VDC, 7.5A max, 375 Watts 12 VDC, 7.5A max, 90 Watts
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation: 158W (539.1 BTU/h)
- Power Consumption: 659W (2448.6 BTU/h)

## Summit X250e-48p

### General Specifications

#### Performance

- 97.6 Gbps switch fabric bandwidth
- 39.9 Mpps frame forwarding rate
- 9,216 Byte maximum packet size (Jumbo Frame)
- 128 load sharing trunks, up to 8 members per trunk
- 8 QoS queues/port
- 4,094 VLANs (Port, Protocol, IEEE 802.1Q)
- 1,024 centralized ACL rules per 24-port

#### Forwarding Tables

- Layer 2/MAC Addresses: 8K
- IPv4 LPM Entries: 512
- IPv6 LPM Entries: 256

#### Rate Limiting

- Ingress bandwidth policing/rate limiting per flow
- Egress bandwidth rate limiting per egress queue
- Rate Limiting Granularity: 64Kbps
- Available Rate Limiters: 1,024 per switch

#### Indicators

- Per port status LED including power status
- System Status LEDs: management, fan and power

#### Ports

- 48 ports 10/100BASE-T PoE with auto-speed and auto-polarity
- 2 ports Gigabit Ethernet (SFP mini-GBIC, shared PHY with 2 10/100/1000BASE-T ports)
- 2 SummitStack stacking interfaces
- 1 port serial (console port)
- 1 10/100BASE-T out-of-band management port

## Physical Specifications

### Dimensions and Weight

Height: 1.73 Inches/4.4 Cm  
Width: 17.35 Inches/44.1 Cm  
Depth: 15.28 Inches/38.8 Cm  
Weight: 12.06 lbs/5.48 Kg

### EPS Dimensions and Weight

#### EPS-C

Height: 1.73 Inches/4.4 Cm  
Width: 17.4 Inches/44 Cm  
Depth: 11.9 Inches/30.2 Cm

#### EPS-600LS

Height: 1.59 Inches/4.0 Cm  
Width: 4.0 Inches/10.1 Cm  
Depth: 10.4 Inches/26.4 Cm

## Operating Specifications

### Temperature

- Operating Temperature Range: 0° C to 40° C (32° F to 104° F)
- Operating Humidity: 10% to 93% relative humidity, non-condensing
- Operational Shock (Half Sine): 30 m/s<sup>2</sup> (3g), 11ms, 60 Shocks
- Operational Random Vibration: 3-500 MHz @ 1.5g rms

### Storage & Transportation Conditions (Packaged)

- Transportation Temperature: -40° C to 70° C (- 40° F to 158° F)
- Storage and Transportation Humidity: 60% to 95% RH, non-condensing
- Packaged Shock (Half Sine): 180 m/s<sup>2</sup> (18g), 6ms, 600 shocks
- Packaged Sine Vibration: 5 – 62 Hz @ Velocity 5mm/s, 62 – 500 Hz @ 0.2 G
- Packaged Random Vibration: 5 – 20 Hz @ 1.0 ASD w/-3dB/oct. from 20 – 200 Hz
- 14 drops min on sides & corners @ 42" (<15kg box)

# Technical Specifications

## Power & Acoustic Sound

- Voltage Input Range: 90 – 264V
- Nominal Input Ratings: 100–240V~, 50/60Hz, 5.5A
- Input Current (with PoE full load): 4.5A @ 115V~ (lowline) 2.25A @ 230V~ (high-line)
- Input Current (without PoE): 0.75A @ 115V~ (lowline) 0.5A @ 230V~ (high-line)
- Maximum In-Rush Current: 30A @115V/60 Hz, Max Load
- Efficiency: 78% with 60% – 100% load
- Line Frequency Range: 47 – 63 Hz
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation (with PoE full load): 130W (444 BTU/h)
- Power Consumption (with PoE full load): 525W (1,791 BTU/h)
- Heat Dissipation (without PoE): 75W (256 BTU/h)
- Power Consumption (without PoE): 75W (256 BTU/h)
- Acoustic Noise (Low FAN Speed): 39 dBA per ISO 7779
- Acoustic Noise (High FAN Speed): 46 dBA per ISO 7779

## External Power Supply – EPS-600LS

- Voltage Input Range: 90 – 264 V
- Nominal Input Voltage/Hz: 115V~/60Hz & 230V~/50Hz, 10.0A
- Line Frequency Range: 47 – 63 Hz
- Maximum Input Current Rating: 7.0A at 115 VAC, 3.5A at 230 VAC
- Maximum Inrush Current: 30A at 115 VAC, 60A at 230 VAC
- External Power Supply–EPS-C Chassis accepts up to three EPS-600LS power modules and provides the following capability depending upon the number of EPS-600LS installed
  - One EPS-600LS
- Redundant, up to 370W PoE power
  - Two EPS-600LS
- Redundant, up to 370W PoE power
  - Non-Redundant, up to 740W PoE power
  - Three EPS-600LS
- Redundant, up to 740W PoE power
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation: 219W (747.7BTU/h)
- Power Consumption: 801W (2733.1BTU/h)

## External Power Supply Chassis System – EPS-C with three EPS-600LS installed

- Heat Dissipation: 360W (1228.4BTU/h)
- Power Consumption: 1620W (5,527.7BTU/h)

## Summit X250e-24x

### General Specifications

 Depth: 7.9 Inches/20 Cm

## Operating Specifications

### Temperature

- Operating Temperature Range: 0° C to 40° C (32° F to 104° F)
- Operating Humidity: 10% to 93% relative humidity, non-condensing
- Operational Shock (Half Sine): 30 m/s<sup>2</sup> (3g), 11ms, 60 Shocks
- Operational Random Vibration: 5 – 500 Hz @ 1.5g rms

### Storage & Transportation Conditions (Packaged)

- Transportation Temperature: -40° C to 70° C (- 40° F to 158° F)
- Storage and Transportation Humidity: 60% to 95% RH, non-condensing
- Packaged Shock (Half Sine): 180 m/s<sup>2</sup> (18g), 6ms, 600 shocks
- Packaged Sine Vibration: 5 – 62 Hz @ Velocity 5mm/s, 62 – 500 Hz @ 0.2 G
- Packaged Random Vibration: 5 – 20 Hz @ 1.0 ASD w/-3dB/oct. from 20 – 200 Hz
- 14 drops min on sides & corners @ 42" (<15kg box)

### Power & Acoustic Sound

- Voltage Input Range: 90 – 264V Nominal Input Ratings: 100 – 240V~, 50/60Hz, 1.0A
- Input Current: 1.0A @ 115V~ (lowline) 0.5A @ 230V~ (high-line)
- Maximum In-Rush Current: 30A @115V/60 Hz, Max Load
- Efficiency: 83% with 60% – 100% load
- Line Frequency Range: 47 – 63 Hz
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation: 49W (167.2 BTU/h)
- Power Consumption: 49W (167.2 BTU/h)
- Acoustic Noise (Low FAN Speed): 37 dBA per ISO 7779

- Acoustic Noise (High FAN Speed): 45 dBA per ISO 7779

### External Power Supply – EPS-500

- Voltage Input Range: 90 – 264V
- Nominal Input Ratings: 100 – 240V~, 50 – 60Hz, 4A
- Line Frequency Range: 47 – 63 Hz
- Maximum Input Current: 2A at 115 VAC, 1A at 230 VAC
- Maximum Inrush Current: 30A at 115 VAC, 60A at 230 VAC
- Power Supply Input Socket: IEC 320 C14
- Power Cord Input Plug: IEC 320 C13
- Heat Dissipation: 38.5W (131.4 BTU/h)
- Power Consumption: 178W (607.4 BTU/h)

## All Summit X250e Series

### Regulatory/Safety Standards

#### North American Safety of ITE

- UL 60950-1:2003 1st Ed., Listed Device (U.S.)
- CSA 22.2#60950-1-03 1st Ed.(Canada)
- Complies with FCC 21CFR 1040.10 (U.S. Laser Safety)
- CDRH Letter of Approval (U.S. FDA Approval)
- IEEE 802.3af 6-2003 Environment A for PoE Applications

#### European Safety of ITE

- EN 60950-1+A11:2001 TUV-R GS Mark by German Notified Body
- EN 60825-1+A2:2001 (Lasers Safety)
- 73/23/EEC Low Voltage Directive
- International Safety of ITE
- CB Report & Certificate per IEC 60950-1:2001+All Country Deviations
- AS/NZS 60950-1 (Australia /New Zealand)

### EMI/EMC Standards

#### North America EMC for ITE

- FCC CFR 47 part 15 Class A (U.S.A.)
- ICES-003 Class A (Canada)

#### European EMC standards

- EN 55022+A2:2003 Class A
- EN 55024+A2:2003 Class A includes IEC 61000-4- 2, 3, 4, 5, 6, 11
- EN 61000-3-2,3 (Harmonics & Flicker)
- ETSI EN 300 386:2001 (EMC Telecommunications)
- 89/336/EEC EMC Directive

### International EMC Certifications

- CISPR 22:1997 Class A (International Emissions)
- CISPR 24:1997 Class A (International Immunity)
- IEC/EN 61000-4-2 Electrostatic Discharge, 8kV Contact, 15kV Air, Criteria A
- IEC/EN 61000-4-3 Radiated Immunity 10V/m, Criteria A
- IEC/EN 61000-4-4 Transient Burst, 1kV, Criteria A
- IEC/EN 61000-4-5 Surge, 2kV L-L, 2kV L-G, Level 3, Criteria A
- IEC/EN 61000-4-6 Conducted Immunity, 0.15-80MHz, 10V/m unmod. RMS, Criteria A
- IEC/EN 61000-4-11 Power Dips & Interruptions, >30%, 25 periods, Criteria C

### Country Specific

- VCCI Class A (Japan Emissions)
- AS/NZS 3548 ACA (Australia Emissions)
- CNS 13438:1997 Class A (BSMI-Taiwan)
- MIC Mark, EMC Approval (Korea)

### Telecom Standards

- ETSI EN 300 386:2001 (EMC Telecommunications)
- ETSI EN 300 019 (Environmental for Telecommunications)

### Summit X250e Series Redundant PSUs

#### EPS-160 and EPS-T

EPS-160 is the redundant AC Power Supply for lower power consuming AC PSU based summit switches. When installing it, EPS-T power tray is required to rack mount this external power supply. EPS-T power tray can take up to two EPS-160 power modules, and each EPS-160 works individually. EPS-160 comes with DC output cable to connect between Summit switch and EPS-160.

Front View

#### EPS-500

EPS-500 is the redundant AC Power Supply for higher power consuming AC PSU based switches including Power-over-Ethernet enabled switches. EPS-500 is one rack unit height and works in standalone. EPS-500 can be rack mounted in a regular 19 inch rack system. EPS-500 comes with a DC output cable to connect between the Summit switch and EPS-500.

Front View

Rear View

#### EPS-600LS and EPS-C

EPS-600LS is a power module that works with the EPS-C External Power System Chassis. EPS-C has three slots for EPS-600LS and one DC output to connect to high density PoE Summit switches. Depending upon the number of EPS-600LS installed in EPS-C, it can provide 1) Redundant configuration for up to 370 watts of PoE power when one EPS-600LS installed; 2) Non-Redundant configuration for up to 740 watts of PoE power when two EPS-600LS installed; and 3) Redundant configuration for up to 740 watts of PoE power when three EPS-600LS are installed. EPS-C comes with a DC output cable to connect between the Summit switch and EPS-C with EPS-600LS installed.

### Redundant PSU Compatibility Matrix

Summit Switch Models	Summit Switch Part Number(s)	External Redundant PSU options
Summit X250e-24t	15101	EPS-160 power module (10907) with EPS-T (10906)
Summit X250e-48t	15103	EPS-160 power module (10907) with EPS-T (10906)
Summit X250e-24p	15105	EPS-500 external power supply (10911)
Summit X250e-48p	15107	EPS-C (10912) and EPS-600LS (10913)
Summit X250e-24x	15109	EPS-160 power module (10907) with EPS-T (10906)

## Ordering Information

Part Number	Name	Description
15101	Summit X250e-24t	24 10/100BASE-TX, 2 gigabit combo ports (2 unpopulated gigabit SFP and 10/100/1000BASE-T), 2 SummitStack stacking ports, ExtremeXOS Edge License, 1 AC PSU, connector for EPS-160 external redundant PSU
15103	Summit X250e-48t	48 10/100BASE-TX, 2 gigabit combo ports (2 unpopulated gigabit SFP and 10/100/1000BASE-T), 2 SummitStack stacking ports, ExtremeXOS Edge License, 1 AC PSU, connector for EPS-160 external redundant PSU
15105	Summit X250e-24p	24 10/100BASE-TX with PoE, 2 gigabit combo ports (2 unpopulated gigabit SFP and 10/100/1000BASE-T), 2 SummitStack stacking ports, ExtremeXOS Edge License, 1 AC PSU, connector for EPS-500 external redundant PSU
15107	Summit X250e-48p	48 10/100BASE-TX with PoE, 2 gigabit combo ports (2 unpopulated gigabit SFP and 10/100/1000BASE-T), 2 SummitStack stacking ports, ExtremeXOS Edge License, 1 AC PSU, connector for EPS-C external redundant power system chassis (requires EPS-600LS)
15108	Summit X250e-48p-TAA	U.S. Federal TAA, Built to Order, Call for Lead Time, 48 10/100BASE-TX with PoE, 2 gigabit combo ports (2 unpopulated gigabit SFP and 10/100/1000BASE-T), 2 SummitStack™ Stacking ports, ExtremeXOS Edge license, 1 AC PSU, connector for EPS-C external redundant power system chassis (requires EPS-600LS)
15109	Summit X250e-24x	24 100BASE-X SFP, 2 gigabit combo ports (2 unpopulated gigabit SFP and 10/100/1000BASE-T), 2 SummitStack stacking ports, ExtremeXOS Edge License, 1 AC PSU, connector for EPS-160 external redundant PSU
15113	Summit X250e series Advanced Edge License	ExtremeXOS Advanced Edge License, Summit X250e series
10906	EPS-T <sup>1</sup>	External Power System power tray. Accepts up to two EPS-160 power modules
10907	EPS-160 <sup>1</sup>	External Power System power module for EPS-T, 160 Watts, with cable
10911	EPS-500 External AC PSU <sup>2</sup>	External Power System 500 Watts, with Cable
10912	EPS-C <sup>3</sup>	External Power Supply Unit, with cable. Accepts up to three EPS-600LS power modules
10913	EPS-600LS <sup>3</sup>	External Power System Power Module for EPS-C, 600 Watts
10051	SX mini-GBIC	1000BASE-SX Mini-GBIC, SFP, 1000BASE-SX, LC Connector
10052	LX mini-GBIC	1000BASE-LX Mini-GBIC, SFP, 1000BASE-LX, LC Connector
10053	ZX mini-GBIC	1000BASE-ZX Mini-GBIC, SFP, Extra Long Distance SMF 70 km/21 dB Budget, LC Connector
10064	LX100 mini-GBIC	1000BASE-LX100 Mini-GBIC, SFP, Extra Long Distance SMF 100 km/30 dB Budget, LC Connector
10056	1000BX mini-GBIC BX-D	1000BASE-BX-D Mini-GBIC, SFP, SMF (1490 nm TX/1310 nm RX Wavelength), LC Connector
10057	1000BX mini-GBIC BX-U	1000BASE-BX-U Mini-GBIC, SFP, SMF (1310-nm TX/1490-nm RX Wavelength), LC Connector
10058	100BASE-BX SFP BX-D	100M SFP, 100BASE-BX-D, SMF (1550-nm TX/1310-nm RX wavelength), 100~155Mbps bidirectional
10059	100BASE-BX SFP BX-U	100M SFP, 100BASE-BX-U, SMF (1310-nm TX/1550-nm RX wavelength), 100~155Mbps bidirectional
10066	100BASE-LX10 SFP	100M SFP, 100LX10 SMF, Support for 100M SFP ports, (1310-nm 10km singlemode transmission) LC connector
10067	100BASE-FX SFP	100M SFP, 100FX MMF, Support for 100M SFP ports, (1310-nm, 2km multimode transmission) LC connector
16106	Stacking Cable, 0.5M	SummitStack/UniStack stacking cable, 0.5M
16107	Stacking Cable, 1.5M	SummitStack/UniStack stacking cable, 1.5M
16108	Stacking Cable, 3.0M	SummitStack/UniStack stacking cable, 3.0M
16105	Stacking Cable, 5.0M	SummitStack Stacking Cable, 5.0M (not supported for UniStack)

<sup>1</sup> Compatible with Summit X250e-24t, Summit X250e-48t

<sup>2</sup> Compatible with Summit X250e-24p

<sup>3</sup> Compatible with Summit X250e-48p
